Question-2:

Perform UPDATE, DELETE Queries with user table

1.

```
UPDATE USERS
SET EMAIL = 'admin@gmail.com'
WHERE NAME = 'abcd';
```

2. delete from USERS where NAME='abcd';

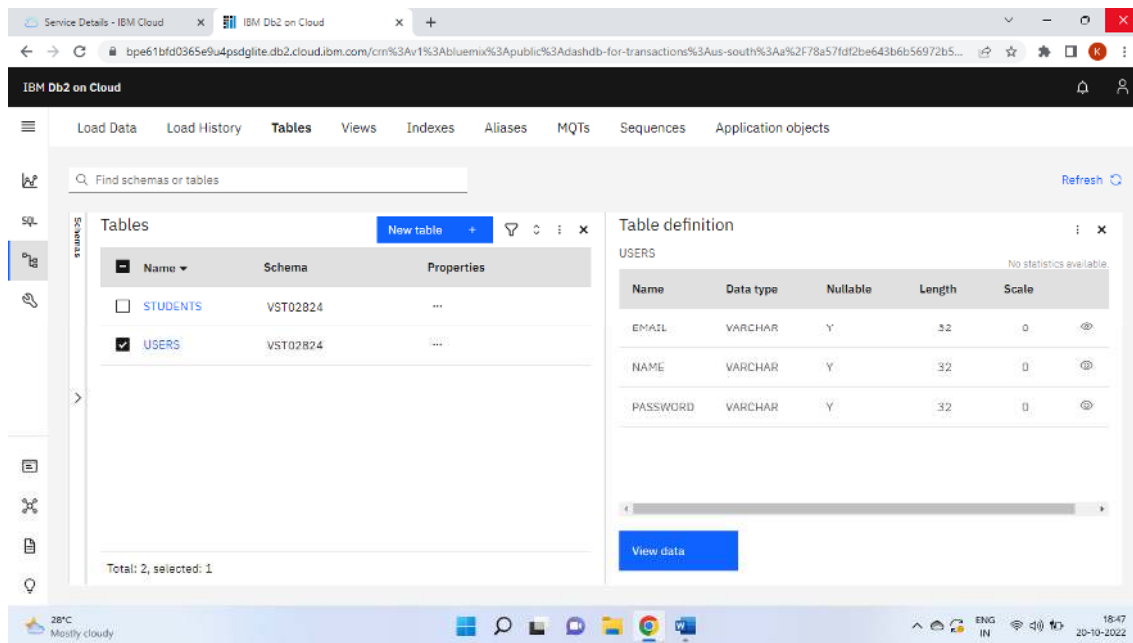

The screenshot displays the IBM Db2 on Cloud web interface. The top section shows a SQL editor with the query `delete from USERS where NAME='abcd';` entered. Below the editor, a 'History' tab is active, showing a list of executed scripts with their dates, statuses, and runtimes. The bottom section shows the 'VST02824.USERS' table view, which contains five rows of user data.

In today's world everyone wants to be successful but what is a success. The perspective of success varies from person to person. For the record, the people before us have a different view on success and the person after us will have a different view on success.

Moreover, people compare different people performance to evaluate their success. But success is not something that you can copy from others. You have to make your own path to achieving success. In modern-day, people are obsessed with success because of the glamour and lifestyle of successful people.

### What formulates a person successful?

There are many ways in the world to be successful. But most people think of celebrities, artist, politicians, and businessmen whenever they heard the word success.

Moreover, they think doing what they will make you successful but that not the case. They forget the most basic thing that makes a person successful that is their hard work, dedication, and the desire to achieve their dream. More importantly, they what they like to do not what that others told them to do. Successful people do what they like to do also they do what they feel correct for their business.

If you look in the dictionary for the meaning of the word success then you will find that it means the achievement of one's goal or aim. So, basically, anyone can achieve success by simply achieving their aim or goal.
